SUMMARY

Full Stack Developer with **3.5+ years of experience** designing and building **scalable web applications and back-end systems**. Proficient in **React.js, Node.js, TypeScript, PostgreSQL, and cloud-based infrastructure**. Experienced in **REST API development, LLM/AI API integration, and real-time data streaming using Server-Sent Events (SSE)**. Focused on clean architecture, performance, and end-to-end product ownership.

EXPERIENCE

Software Developer

LTIMindtree

Aug 2022 - Present

Pune, Maharashtra

- Developed and maintained **scalable full-stack web applications** using **React.js, Node.js, and Express.js**, improving user engagement by **40%** and delivering production-ready features.
- Designed and optimized backend services and data workflows using **PostgreSQL and Prisma ORM**, improving application performance and **reducing response latency by 30%**.
- Integrated **AWS S3** for secure and scalable file storage and retrieval, enabling efficient handling of high-volume uploads and improving asset delivery performance.
- Delivered cross-platform responsive applications using **React.js and Next.js**, maintaining **99.9% uptime** and consistent UX across desktop, tablet, and mobile devices.
- Designed and implemented **Snowflake-based ETL pipelines** for data transformation and ingestion, improving data processing efficiency and enabling near real-time analytics.

PROJECTS

HireMind ([GitHub](#)) | ([Live Demo](#))

AI-powered resume analysis platform with async job processing, LLM-driven match scoring, and real-time cover letter streaming via SSE.

- Engineered structured **prompt templates for Claude Sonnet 4.5 via OpenRouter** to return validated JSON payloads, 0–100 match scores, severity-tiered (Low/Medium/High) skill gaps, and 5 interview Q&A pairs, after server-side PDF text extraction using **pdf-parse** on a **Bun + Express.js** backend with **PostgreSQL + Prisma ORM**.
- Decoupled AI report generation from the HTTP request cycle via **Redis-backed BullMQ** (2 retries, exponential backoff), returning an immediate job ID for client-side polling; streamed cover letter output as **SSE chunks** and automated job description ingestion from public URLs via **Firecrawl API**.
- Secured auth with **JWT httpOnly cookies**, 10-minute **Redis-cached OTPs** delivered via **Resend**, and **bcrypt** hashing, stored PDFs in user-scoped **Supabase** private buckets, validated all inputs with **Zod** schemas, and rate-limited AI report routes using **express-rate-limit**.

SKILLS

Frontend

HTML, CSS, Tailwind CSS, React.js, Next.js, Vite

Backend

Node.js, Express.js, Bun, REST APIs, Server-Sent Events (SSE), System Design

AI / LLM

OpenAI API, OpenRouter, LLM Integration, Prompt Engineering

Database

PostgreSQL, MongoDB, Prisma ORM, SQL, Snowflake (ETL, Data Warehousing)

Cloud & DevOps

AWS (S3, EC2, Lambda), Docker, Nginx, CI/CD

Languages

TypeScript, JavaScript, Python

Tools

Git, GitHub, Cursor, Turborepo, Data Structures & Algorithms

EDUCATION

Bachelor Of Engineering, AISSMS (Pune University)

CGPA - 8.97/10

2018 - 2022

Pune, Maharashtra
